

MSCA Investments Committee Report to the 2023 Delegate Assembly

At the 2022 Delegate Assembly, a New Business Item calling for the active divestment in nuclear weapons was passed. In conjunction with this, while our investment fund is robust and doing quite well, there is no clearly defined aim or overall purpose for the account.

In order to generate financial returns while also investing in industries, and companies in line with the MSCA's objectives and goals, the Board of Directors approved the creation of an Investments Committee. This committee is charged with examining the MSCA's current investment portfolio and making recommendations for the future.

Recruiting members to serve on the Investments Committee has been a challenge, however our first meeting is scheduled for May 2nd.

Respectfully submitted,
Eric Weeks
